

A Look Ahead...

A publication for Fernald stakeholders

Fernald to ship second train

Fernald plans to ship a second train of contaminated soil from the Waste Pit Project to Envirocare of Utah by May 17. The train will contain about 50 railcars. The first train is scheduled to return to Fernald for reloading by May 13. IT Corp. continues to load about 16 railcars per week.

Liquid mixed waste to be shipped off site

The next shipment of liquid mixed waste (Batch 8) will be sent to the Toxic Substance Control Act Incinerator in Oak Ridge, Tennessee at the end of May. Other batches will be shipped in early June. Newly generated waste streams continue to be evaluated for bulking into Batches 9, 10, and 11.

Ohio Field Office risk profile summary available

Copies of risk profiles for the five Ohio Field Office sites are available at DOE's Public Environmental Information Center (PEIC). These profiles are an appendix to a much larger document containing risk profiles for DOE sites across the nation. The profiles are intended to communicate an overview of risk concerns associated with environmental management sites and provide information about risk management progress. DOE-Fernald would like input from stakeholders on the risk profiles. Public comments should be submitted to Gary Stegner, DOE Public Affairs by June 4, 1999.

Citizens Advisory Board to host transportation workshop

The Fernald Citizens Advisory Board will host a transportation workshop for other stakeholder groups within the DOE complex from May 20-23 at the Vernon Manor Hotel in Cincinnati, Ohio. Participation in this workshop is limited to members of these Site Specific Advisory Boards and their guests including individuals from DOE, regulatory agencies, state/local governments, emergency management organizations, and other agencies vitally interested in issues related to the transportation of waste to disposal sites across the nation.

Fernald Community Reuse Organization to seek funding

In mid-May, the Fernald Community Reuse Organization (CRO) will submit its *final draft Community Transition Plan* and funding request to DOE. The CRO will seek about \$4 million annually over a three-year period to stimulate new job growth for Fernald workers and local communities in order to lessen the economic impact of Fernald's closure. The next CRO meeting will be held May 18 at 6:30 p.m. in the Ross High School Media Center. The meeting is open to the public.
